

Cardiff Marriott

Project	Cardiff Marriott
Main Contractor:	Dean & Dyball
Date:	2007
Size:	2400m2
Specialist Contractor:	Deccon Ltd

The new build project was carried out creating a crack bridging waterproof driving surface to the exposed roof decks and access ramps. The Deckmaster System R offers excellent crack bridging properties with a driving surface that is both non slip and colour coded to denote parking bays and traffic aisles. The line marking and signage was applied in compatible materials to complete the scope of works.

The Deckmaster system R has been tested and certified by the BRE to BSEN 1504-2
